

GIMHANA MITHURANGA

FULL STACK SOFTWARE ENGINEER

+94 70 504 5099 | mg4.aca@gmail.com | linkedin.com/in/mithuranga

PROFESSIONAL SUMMARY

Detail-oriented Full Stack Software Engineer with 4 years of experience delivering high-performing web applications and scalable event-driven solutions. Competent across both frontend and backend development with deep expertise in Vue.js, Node.js ecosystems, and cloud integrations. Proven ability to operate autonomously in fast-paced agency environments, managing complex client feature requests and engineering reliable software systems optimized for performance and security.

TECHNICAL SKILLS

- **Languages:** JavaScript, Java, PHP, HTML, CSS
- **Frameworks:** Vue.js (Composition & Options API), Node.js (Express, Koa.js), React.js, Laravel, Spring Boot, Spring WebFlux
- **Databases & Caching:** MySQL, SQL Server, MongoDB, Redis
- **Cloud & DevOps:** AWS (Lambda, EC2, Amplify, S3, API Gateway), Git version control
- **Architecture & Patterns:** Clean Architecture, CQRS, Event-Driven Design, RESTful APIs, JWT Authentication

PROFESSIONAL EXPERIENCE

Recurved Digital Solutions

Colombo, Sri Lanka (Jul 2024 – Apr 2026)

Full Stack Software Engineer

Responsible for the full-lifecycle development and deployment of web applications and automation workflows for diverse client brands within a rapid-delivery agency ecosystem.

- **Multi-Framework Development:** Engineered responsive client web applications utilizing Vue.js/Nuxt.js and React/Next.js, optimizing frontend structures for fast load times and search engine visibility.
- **Cross-Stack Backend APIs:** Built resilient server-side applications and RESTful APIs using Node.js (Express, Koa) and Laravel, maintaining dedicated backend and database instances (MySQL, PostgreSQL, MongoDB) per client to ensure complete data isolation.
- **Workflow Automation:** Implemented n8n automation pipelines to streamline social media content distribution and synchronized data structures across client environments.
- **Cloud & Server Management:** Handled application deployments and configuration across AWS (EC2, S3, Route53) and private VPS environments, utilizing AWS Lambda for lightweight background processing tasks and automated reporting.
- **Application Security:** Protected application endpoints by writing custom middleware layers handling JWT authentication and implementing targeted IP-based rate limiting via `express-rate-limit` to insulate sensitive authentication and form submission routes.

Velou Inc.

Remote (Nov 2022 – Jul 2024)

Software Engineer / Associate Software Engineer

- **Internal Data Tools:** Built dynamic, fully responsive user interfaces using Vue.js (Composition API) and Pinia to enable complex technical product attribute validation.
- **Backend API Integration:** Integrated responsive frontends with a Koa.js backend infrastructure to handle high-throughput interactions with large, complex datasets.

Associate Software Engineer / Intern Software Engineer

- **Backend Engineering:** Wrote resilient, testable server-side application logic and engineered high-performance RESTful APIs using Spring Boot and Spring WebFlux architectures.
- **Database Management:** Formulated and optimized schema designs, querying routines, and indexing strategies inside production MySQL instances.
- **Team Collaboration:** Used Git regularly to maintain streamlined branching models, clean version control operations, and collaborate during agile sprint cycles.

EDUCATION

- **B.Sc. (Hons) in Software Engineering** | Cardiff Metropolitan University (Completed 2023)
- **Graduate Diploma in Software Engineering** | Institute of Software Engineering (Completed 2022)
